

Math Notes Requirements

1. TITLE the notes - this will make it easier to find the page you need when you are doing a review that mixes information from several days or chapters.
2. Make it legible.
3. You don't need every word on the slide. You need enough words so you understand.
4. Use color to highlight vocabulary words, steps where your teacher identifies common mistakes, etc.
5. Annotate at least one example for each process.
6. Remember these notes are for YOUR use. If they don't make sense to you later, they're not complete.
